

NGUYỄN HỮU KHANG

Experience Description

As a HCMUT student i have taken part in two projects. I also have a part-time job relating to computer science

Count Things with Yolo

In this project, we use YOLO algorithm to develop an application which has a function of counting things. My role is annotating images and research about the operation mechanism of YOLO. After this project, I have an experience in using annotating tool and basic knowledges about YOLO Algorithm.

EcoLux Bin

EcoLux Bin is a project about developing a smart recycle bin. My role is suggesting a workflow of the bin, developing payment method and classifying method. The project is in progress and currently it is using my workflow suggestion.

Teaching assistant

Apart from learning and developing computer science projects. I am also currently working as a teaching assistant for a programming course for kids. This course uses <https://kids.hatchxr.com/>.
